

Let's learn about:

# HYDROPONIC LETTUCE

- > Lettuce grows faster in a hydroponic system.
- > Hydroponic systems use 90% less water than traditional soil farming.
- > Fewer chemicals are needed because hydroponic lettuce is grown indoors away from bugs.
- > There are 5 types of lettuce: loose leaf, romaine, crisphead, butterhead, and stem.
- > Lettuce is about 95% water.
